Education

2023-2025

Frontend Developer
Medieinstitutet

2009-2012

Bachelor Degree, Chemistry
Uppsala University

Expertise

Languages

- PHP / Typescript
- Javascript / C#
- Python

Frameworks

- React / Vue
- Next / Node
- SvelteKit / Alpine
- React Native / Expo

Styling

- CSS / Sass
- Tailwind / Material UI
- Less / Bootstrap

UX / UI

- Figma / After Effects

Experience

2025 -

AfterClass, Stockholm

Freelance Fullstack-developer

I currently work part-time as a freelance developer for AfterClass, where I am responsible for building and maintaining their app, enhancing both the user and admin dashboards, and developing the backend API with Stripe integration among other things. The role allows me to work across the full stack and contribute to both the technical direction and user experience of the platform.

2024 - 2025

Cubeia AB, Stockholm

Fullstack-developer

Part time work where I contributed to the development of Cubeia's poker application, drawing from previous professional experience to inform design decisions and feature development. My work involved implementing new features, optimizing performance, and refining core functionality to improve the overall gameplay and user experience. I also collaborated closely with the team on architectural decisions and UX improvements. This role deepened my experience working with a large, modular codebase and strengthened my ability to contribute effectively in a fast-paced, professional development environment.

2024-2025

Digital Island, Uppsala

Fullstack-developer

I worked at a web agency in Uppsala, where I independently delivered several diverse and rewarding projects across different technologies. One project focused on detecting manipulated or fake audio files using metadata, spectrum analysis, and machine learning, and included writing a comprehensive technical report. I also developed the new website for Region Stockholm's subway expansion.

In addition, I worked with Shopify's Liquid templating system and contributed to headless CMS implementations.

DevOps

- Docker / Kubernetes
- AWS

CMS

- Wordpress / Woocommerce,
- Shopify / Sanity

State Management

- Redux / Pinia
- Vuex / Context API

Databases

- MySQL, PostgreSQL,
- MongoDB, MariaDB

Tools

- Git / Github
- Webpack / Vite
- GraphQL / Firebase / Storybook

Testing

- Vitest / Jest
- Cypress

Personal skills

- Analytical
- Strong communicator
- Team player
- Responsible
- Curious and adaptable
- Empathic

Languages

- English
- Swedish

2025 -

Distance

Volunteer Developer

I am independently building a web platform to support individuals living with bipolar disorder. Although I have the skills to monetize the project, I have chosen to keep it fully non-profit. The site includes tools like a mood tracker, personal diary, and AI assistant, along with sections for information, research, and multimedia content to promote understanding and self-care.

2023-2025

Distance / Superprof

Private tutor

Through my work as a private tutor in software development, I have deepened my technical knowledge and improved my ability to explain complex concepts. It has strengthened my communication skills and adaptability while supporting others in their learning.

2020-2025

Distance

Freelance

Through self-study and hands-on freelance work, I have acquired in-depth knowledge of modern web technologies and development practices. This includes experience with frontend and backend development, working with APIs, and building responsive, user-friendly applications. Taking full ownership of projects has sharpened my problem-solving skills, deepened my technical understanding, and strengthened my ability to learn new tools and frameworks quickly, all of which have been crucial to my growth as a software developer.

2012-2022

Uppsala, traveling

Professional pokerplayer

As a former professional poker player, I developed a combination of creativity and analytical skills. In the world of poker, I learned to understand complex probabilities and adapt to various playing styles, which sharpened my problem-solving abilities. I also gained a deep appreciation for discipline and self-control, especially under pressure, and learned how to make decisions based on incomplete information. These skills have proven invaluable in many different contexts.
