

# Matthias Nilsson

## Developer

As a former professional poker player, I have cultivated a unique blend of creativity and analytical prowess. These attributes have been invaluable in transitioning to a career in software development. Through dedication and deep commitment, I've swiftly acquired technical skills, enhancing my ability to deliver efficient and innovative solutions in frontend development.

Webpack / Babel

### Databases

- SQL (MySQL, GraphQL)  
NoSQL (MongoDB)

### Work methods

- Agile/Scrum

## Experience

**2024 - 2025**

Cubeia AB, Stockholm

### Junior frontend-developer

Worked in the poker team at Cubeia, where I developed their application and provided my expertise in poker. Tasks ranged from developing new features to collaborating on the overall design and functionality of the platform. Also contributed to enhancing the player experience and optimizing existing features.

**2024-2025**

Digital Island, Uppsala

### Internship

Internship at a web agency in Uppsala specializing in CMS, SEO, and marketing. My tasks varied from working with AI and machine learning to developing themes based on client requests. One moment I might be using Shopify's Liquid system, and the next managing a headless CMS system in Next.js.

**2023-2025**

Medieinstitutet

### Student frontend-development

Currently, I am a dedicated student aspiring to become a proficient frontend developer, constantly expanding my understanding of the tech industry and my future profession. My focus extends beyond technical skills to include developing soft values like communication, teamwork, and problem-solving. My education has provided me with deeper insights into agile methodologies, especially Scrum, enhancing my ability to collaborate effectively in teams and adapt to rapid changes.

**2021-2023**

Distance

### Programming self-learning

Through self-study i aquired in-depth knowledge of modern web technologies, crucial for my development in frontend. To further enhance my skills, I have completed practical projects on Frontendmentor.io, creating advanced, responsive, and interactive web applications.

**2012-2022**

Uppsala, traveling

### Professional pokerplayer

In my career as a professional poker player, participating in various tournaments and cash games, I honed my ability to navigate complex situations with skill and tact. Based in a centra office in Uppsala, shared with seasoned players, I mastered the art of balancing risk and reward, as well as maintaining composure under pressure. International travel for competitions enriched me with insights into diverse cultures and viewpoints. My career was marked not only by financial discipline and continuously adapted gaming strategies but also by a profound understanding of human behavior and psychology, crucial to my longstanding success in poker
