

# Matthias Nilsson

## Software developer

As a former professional poker player, I have cultivated a unique blend of creativity and analytical prowess. These attributes have been invaluable in transitioning to a career in software development. Through dedication and deep commitment, I've swiftly acquired technical skills, enhancing my ability to deliver efficient and innovative solutions in frontend development.

- Vitest / Jest / Cypress

### Frameworks

- React / Vue / Next / Node / Electron / Alpine

### State Managment

- Redux / Pinia / Vuex / Context API

### Styling

- CSS / Sass / Tailwind / Material UI / Less /  
Styled components / Bootstrap

### Tools

- Docker / Kubernetes / Git / Vite / Webpack /  
AWS / Figma / After Effects

### Databases

- MySQL, PostgreSQL, MongoDB

### CMS

- Wordpress, Woocommerce, Shopify,  
Sanity

## Experience

**2024 - 2025**

Cubeia AB, Stockholm

### Junior frontend-developer

I worked as part of the development team at Cubeia, where I contributed to their poker application and provided consulting based on experience from my previous professional role. My tasks ranged from developing new features to collaborating on the overall design and functionality of the application. Working with a variety of technologies, a large codebase, and established frameworks helped sharpen my skills and gave me the confidence to take on greater responsibility within the development team. This experience also gave me a deeper understanding of how to build and maintain complex systems in a professional environment.

**2024-2025**

Digital Island, Uppsala

### Internship

Internship at a web agency in Uppsala specializing in CMS, SEO, and marketing. My tasks varied from working with AI and machine learning to developing themes based on client requests. One moment I might be using Shopify's Liquid system, and the next managing a headless CMS system in Next.js.

**2023-2025**

Medieinstitutet

### Student frontend-development

Through my studies at Medieinstitutet, I have expanded my understanding of the tech industry. My education has provided me with deeper insights into agile methodologies, teamwork, communication, and problem-solving. Ultimately, this has strengthened my ability to collaborate effectively in teams and adapt to rapid changes.

**2020-2025**

Distance

### Programming self-learning / freelance

Through self-study i aquired in-depth knowledge of modern web technologies, crucial for my development in software development. To further enhance my skills, I have completed my own advanced, responsive, and interactive web applications. My personal favourite is this project helping people with bipolar disorder: [Bipolärkompassen.se](https://Bipolärkompassen.se)

**2012-2022**

Uppsala, traveling

### Professional pokerplayer

As a former professional poker player, I developed a combination of creativity and analytical skills. In the world of poker, I learned to understand complex probabilities and adapt to various playing styles, which sharpened my problem-solving abilities. I also gained a deep appreciation for discipline and self-control, especially under pressure, and learned how to make decisions based on incomplete information. These skills have proven invaluable in many different contexts.
